Professional Summary

Full stack web developer with 10+ years of experience building, deploying, and supporting web applications, APIs, automation tools, WordPress systems, and blockchain applications. Strong background in Next.js, React, TypeScript, Web3, Node.js, PHP, AWS, Google Apps Script, Solidity, SQL databases, and production troubleshooting.

Work Experience

Full-Stack Web Developer | [Zipsite.net](https://zipsite.net)

August 2023 to Present

Remote

- Designed and developed decentralized applications using Solidity, Next.js, React, and TypeScript.
- Created and deployed token, DAO, token sale, and multi-airdrop smart contracts.
- Built embeddable widgets that allow users to buy and exchange tokens directly from partner websites.
- Migrated legacy PHP projects to modern Next.js applications.
- Integrated smart contracts with frontend applications and blockchain wallet workflows.

Full-Stack Web Developer | [Contrib.com](https://contrib.com)

May 2010 to Aug 2023

Remote

- Designed, developed, deployed, and supported 20,000+ web applications, websites, and frameworks.
- Built and maintained custom PHP, WordPress, JavaScript, and database-driven applications.
- Engineered and deployed serverless API solutions using AWS Lambda.
- Configured and managed AWS services including EC2, S3, IAM, SES, and Lambda.
- Developed custom WordPress themes and plugins based on client requirements.
- Supported team members with troubleshooting, system usage, deployments, and workflow improvements.
- Managed application installation, configuration, integration, and long-term maintenance.

Technical Skills

- **Languages & Frameworks:**
Next.js, TypeScript, React, PHP, Node.js, Web3, JavaScript, Python, Solidity, C#.NET, Google Apps Script
- **Web & CMS:**
WordPress, custom themes, custom plugins, REST APIs, serverless APIs
- **Cloud & Infrastructure:**
AWS Lambda, EC2, S3, IAM, SES, cloud deployment, serverless applications
- **Databases:** MySQL, PostgreSQL, Microsoft SQL Server
- **Source Control:** Git, AWS CodeCommit, SVN
- **DevOps & Tools:** Docker, application deployment, software configuration, system integration
- **Technical Support:**
Troubleshooting, root cause analysis, incident resolution, hardware and software support
- **CAD / Manufacturing:** ProNest, CAD modeling, G-code generation, plasma and oxy-fuel programming

Education

Bachelor of Science in Computer Science - The University of Mindanao
